

What is claimed is:

1. A yarn organizer, comprising:  
a piece of material; and  
a plurality of cord locks attached to the material.

2. The yarn organizer of claim 1 wherein the material is lap-sized.

3. A yarn organizer, comprising:  
a flexible, rollable panel; and  
a plurality of cord locks attached to the panel.

4. A yarn organizer for carrying and storing skeins of yarn, comprising:

a flexible, rollable panel having an inside surface;  
a plurality of support members adjustably dimensioned to receive skeins of yarn, each support member attached to the inside surface of the panel;

a compact state wherein the flexible panel is rolled; and

a pair of end straps attached to panel, wherein in the compact state, the end straps encircle the panel and releaseably secure the panel.

5. The yarn organizer of claim 4 wherein the support members are cord locks.

6. The yarn organizer of claim 4 wherein the inside surface is black.

7. The yarn organizer of claim 4 wherein the flexible panel comprises a cloth material.

8. The yarn organizer of claim 4 further comprising a pocket attached to the inside surface of the panel.

9. The yarn organizer of claim 8 wherein the pocket is dimensioned to receive scissors.

10. The yarn organizer of claim 8 wherein the pocket is releasably secured to the inside surface of the panel by a fastener.

11. A method of storing skeins, comprising the steps of:  
providing a yarn organizer having a flexible panel and a plurality of cord locks thereon, wherein each cord lock includes a loop and an adjustable fastener for varying the size of the loop;

threading the skeins through the loop of the cord lock; and

adjusting the fastener to securely retain the skeins in the loop while allowing retrieval of individual skeins.

12. The method of claim 11 further comprising the step of rolling the yarn organizer into a compact state.

13. The method of claim 12 wherein in the compact state, the rolled panel is encircled by end straps.

14. A yarn organizer for carrying and storing skeins of yarn, comprising:

a flexible, rollable panel having an inside surface;  
a plurality of support members adjustably dimensioned to receive skeins of yarn, each support member attached to the inside surface of the panel; and  
a compact state wherein the flexible panel is rolled.

15. A yarn organizer for carrying and storing skeins of yarn, comprising:

- a flexible, rollable panel having an inside surface;
- a plurality of cord locks adjustably dimensioned to receive skeins of yarn, the cord locks attached to the inside surface of the panel in a spaced apart relationship; and
- a compact state wherein the flexible panel is rolled.

16. A yarn organizer for holding skeins of yarn, comprising:

- a plurality of cord locks fastened together wherein each cord lock is adjustably dimensioned to receive skeins of yarn; and

- a handle attached to at least one of the plurality of cord locks.

17. A yarn organizer for holding skeins of yarn, comprising:

- a plurality of support members adjustably dimensioned to receive skeins of yarn, the support members fastened together; and

- a handle attached to at least one of the plurality of support members.

18. A yarn organizer for carrying and storing skeins of yarn, comprising:

- a panel having an inside surface; and
- a plurality of cord locks adjustably dimensioned to receive skeins of yarn, the cord locks attached to the inside surface of the panel in a spaced apart relationship.

19. The yarn organizer of claim 18 wherein the panel is a notebook page.
